Data Backup 3 is a powerful utility that allows you to backup, restore and synchronize your valuable data with minimal effort. Whether you are a new computer user or a seasoned professional, Data Backup 3 offers you just the right amount of power, flexibility and ease-of-use to help you protect your files fast.

## Easy

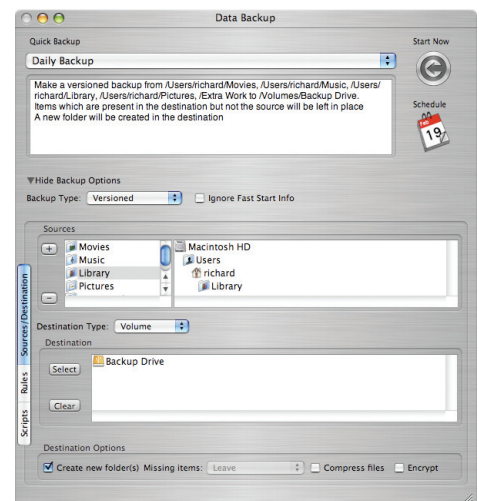

- No complicated setup - built-in backup sets to quickly backup your iTunes or iPhoto files, other important data or your entire system.
- Custom create your own backup sets. Just drag and drop.
- "Fast Start" feature preselects the files to be backed up, saving you time.

## Powerful

- Go "back in time" and see your files and directories, as they were when your backups happened.
- Schedule your backups to automatically run at a specific time, on a recurring basis or when a drive is connected.
- Have your Mac automatically wake from sleep to execute scheduled backups.
- Create a bootable clone of your hard drive.
- Choose to compress and/or password protect your backups.

## Flexible

- Backup to any mounted drive including FireWire, USB, ATA, or networked drives.
- Backup to CD/DVD disks automatically span on multiple disks.
- Creates an exact copy of a folder or a drive, including bootable OS X backups.
- Synchronize folders - perfect if you use more than one computer.
