- **NEW - Online Backup and Recovery**
- **FREE & Premium Off-site backup capabilities**

MSRP: \$49.00

NEW - Online backup and Recovery

Backup and recover your data from anywhere with the new option to use FTP or internet storage accounts.

Smart, Simple Restore

Flexible recover options allow you to restore all your files or only specific files. Users can also chose to restore and overwrite existing files or choose an alternate location.

Smart Select

Automatic file selection for easy backups of emails, photos, music and documents.

Open File Backup

Data Backup PC works with Microsofts™ Volume Copy Shadow Service (also known as VSS) in order to back up open files. The Open File Backup option is limited to operating systems that support Microsofts VSS, including Microsoft Windows XP, Vista (32 bit) and Windows 2003 systems.

Flexible Scheduler

Fully automate and customize your back up times and routines.

E-mail Reporting

Receive emailed status reports of your backups.

Faster Backups

Data Backup PC3 new backup engine offers increased performance for faster backup times.

Step-by-Step Wizards

Instant results with wizard guided instructions.

Virus Protection and Updates

Integrated virus protection to help prevent the transfer of infected files before the backup occurs. Free virus updates are continually made available.

Protect Networked Computers

Data Backup PC is network aware and supports Peer-to-Peer backup to protect your computer and any system on your network.

Plug-and-Play Support

Integrated support for hundreds of storage devices including; CD, DVD, Blu-ray®, USB flash, tape, local and network drives.

Multiple Language Support

English, German, Spanish, Intalian, French, and more.

Expert Technical Support

Free technical support via phone or email to assist you with your backup questions.
