Prosoft Engineering Announces the Release of Data Rescue II for Mac OS X.

Pleasanton, CA – September 22, 2005 - Prosoft Engineering Inc., the makers of easy-to-use, professional quality software, announces the availability of Data Rescue II v1.0 for Mac OS X.

“The best data recovery software for the Mac platform just got better with the new and improved Data Rescue II,” states Greg Brewer, CEO of Prosoft Engineering. Data Rescue II provides a new user interface, more robust file searching and an enhanced ability to recover deleted items. In the development of Data Rescue II, Prosoft worked with the worlds leading drive recovery engineers to create an unparalleled data recovery system. “The bar for data recovery software has just been raised and now users have access to recovery techniques previously unavailable in over the counter software,” states Mr. Brewer.

Data Rescue II for Mac OS X: Emergency Hard Drive Recovery

Data Rescue is the best data recovery utility on the market for recovering files from a problem hard drive. Other utilities can cause more damage to your hard drive and files by trying to 'fix' the problem, instead of focusing on recovering your files.

New Features of Data Rescue II v1.0

- Brand new all Cocoa based GUI user interface
- Assistant mode and Expert mode operation
- Drag and Drop recovery, and double-click to open single files.
- Optimized for Tiger; runs on Panther and Jaguar.
- Supports 10 times more file types for content scans than Data Rescue X.
- New Deleted Files scan, much faster and more capable for finding deleted files
- Integrated Thorough and Content scans; does both in one scan.
- Faster scanning and recovery.
- More reliable file recovery algorithms.
- Authorization is retained. The user's password is needed only once, when launching the first time.

Upgrade pricing is available at www.prosofteng.com as well as a demo version.

Availability

Data Rescue II is available for purchase online at www.prosofteng.com and at Apple Stores, Fry's Electronics, ClubMac, MacMall, MacZone, MacConnection and Amazon.com
