Prosoft Engineering Announces the Release of RecoverSoft Data Rescue PC Version 2.0

Pleasanton, CA – July 27, 2006 – Prosoft Engineering, Inc., the makers of easy-to-use, professional quality software, announces the availability of RecoverSoft Data Rescue PC Version 2.0.

"Data Rescue PC is the best solution for recovering files from a crashed or virus-corrupted hard drive. It comes with a bootable CD so there is no need to install additional software to recover your data. Since Data Rescue PC works from a bootable CD, it can therefore work when Windows won't boot, or in the case where a virus has taken over your computer and won't let you install or run any application," says Greg Brewer, CEO of Prosoft Engineering.

Upgrade pricing is available at www.prosoftengineering.com, as well as a free downloadable demo.

RecoverSoft Data Rescue PC Version 2.0 – Emergency Hard Drive Recovery

RecoverSoft Data Rescue PC is revolutionary in both ease-of-use and power. Simply insert the CD and reboot your computer. Data Rescue PC will automatically access your drive and then guide you through the file recovery process with simple step-by-step directions. With an easy to use graphical user interface, you select the files you wish to recover, then Data Rescue PC will copy those files over to your external USB or FireWire hard drive, secondary internal hard drive, or network drive. Since Data Rescue PC comes on a bootable CD, it works in more cases than traditional Windows-based recovery tools.

New Features of Version 2.0

- **File Preview** - preview files before recovering - images, docs, xls, zip, ppt, pdf, and more
- **Raw Scan Recovery** - able to find more files even after deletion
- **Cloning** - clone a drive that is failing, and use Data Rescue PC to scan the cloned drive (which will be safely saved to a new drive)
- **Network Support** - recover to a network drive
- **Updated Hardware Library** - able to detect more hardware for better compatibility

Availability

RecoverSoft Data Rescue PC Version 2.0 is available for purchase online at www.prosoftengineering.com and at Fry's Electronics and MicroCenter.
