

NEWS RELEASE

Prosoft Engineering Announces the Release of Drive Genius 2.1.

Pleasanton, CA – September 23, 2008 – Prosoft Engineering, Inc., the developers of easy-to-use, award-winning utilities, announced today the immediate availability of Drive Genius 2.1, with the new DriveSlim feature.

"We're really excited about the new DriveSlim™ feature we've added to Drive Genius 2. This feature allows you to quickly scan your hard drives for files that you may want to delete, which will free up valuable hard drive space," says Greg Brewer, CEO of Prosoft Engineering. "This adds even more functionality and usefulness to the mutli-award winning Drive Genius 2."

DriveSlim™ is loaded with these features:

- Search for all duplicate files, show you their location and let you delete the unnecessary duplicates, while making alias in their places.
- Easily locate large files and delete them from your hard drive
- Select which languages you want your Mac to support, and delete the others (that you don't speak).
- Trim applications to only support the new Intel-based Macs.
- Backup any and all files that you have marked for deletion in DriveSlim. That way, you can save the files off to a CD, DVD or hard drive, in case you ever want those files back.

"We are constantly improving and adding features to Drive Genius 2 for our users. From the free Leopard DVD update for all our users, to this new free feature, we are striving to create the best utility on the Mac platform. Prosoft prides itself on great customer service and support, alongside award-winning products. We're also excited to offer a competitive upgrade to Drive Genius 2. Details can be found at our website."

Availability

Drive Genius 2 is available for purchase online at www.prosoftengineering.com and at Apple Stores.
