Prosoft Engineering Announces the Release of NetWare Client for Mac OS X IP Edition Version 2.0

Pleasanton, CA – July 18, 2006 – Prosoft Engineering, Inc., the makers of easy-to-use, professional quality software, announces the availability of NetWare Client for the Mac OS X IP Edition Version 2.0.

"Prosoft is excited about continuing support for NetWare environments. NetWare Client is a major release that provides several new features in addition to support for the latest Intel Macs. Prosoft has been hard at work developing the new generation of NetWare for Mac connectivity," says Gordon Bell, General Manager of Prosoft Engineering.

Upgrade pricing is available at www.prosofteng.com, as well as a full 30-day demo download.

NetWare Client for Mac OS X IP Edition Version 2.0: Connectivity to a Novell Network

NetWare Client is designed for use on Apple computers, whether in a company or home environment. Use this client to connect your Mac to a Novell Network using the IP protocol.

New Features of NetWare Client

- **Integrated login:** The Mac boots with a single login prompt and the NetWare home directory appears on the desktop. This means, no need to remember multiple login passwords and to login twice each time you boot your computer.
- **Contextless login:** The user can login from anywhere on the net by simply providing his username and password, full context information is provided automatically.
- **Printing:** The NetWare Client 2.0 now supports printing to a NetWare queue (users can add jobs to Netware print queues and delete those jobs).
- **Universal Binary:** Works with all the latest Apple computers including the Intel Macs. Compatible with Mac OS X 10.4.2 and up.
- **Completely new browser:** It is now a regular application instead of a menu bar item. It automatically launches in startup if the user selects the option in login items.

Availability

NetWare Client 2.0 for the Mac OS is available for purchase online at www.prosofteng.com and at CDW, MacMall, MacZone, MacConnection and Amazon.com
