

NEWS RELEASE

Prosoft Engineering, Inc. Announces Drive Genius 3.1 with Live Defrag.

Pleasanton, CA – January 25, 2011 – Prosoft Engineering, Inc. announces the release of Drive Genius 3.1 with Live Defrag.

"We are excited to release this new version of Drive Genius 3 that no longer requires users to boot from the DVD or a second drive to use the Defrag function for the boot drive," says Greg Brewer, CEO of Prosoft Engineering, Inc. "The Defrag feature is one of the most popular, award-winning features that Drive Genius 3 offers. Booting from the DVD has long been one of the cumbersome steps involved to defrag. Now users can simply install it as an application and efficiently begin improving the performance of their hard drives. Drive Genius 3.1 also comes on a bootable DVD which incorporates Apple's latest boot technology which now supports all the newest machines from Apple.

Drive Genius 3 – More Power, More Speed, More Options

Is your computer running slower? Is your hard drive filling up and you don't know why? Are you having other issues with your hard drive? Try Drive Genius 3, the best hard drive utility on the Mac platform – DrivePulse®, Enhanced Defrag, DriveSlim™, Enhanced Repartition are only a few of the award-winning features of Drive Genius 3.

Availability

Drive Genius 3 is available for purchase online at www.prosoftengineering.com
